**Hitachi Kokusai to Showcase 4K-UHD Live ST-2110 Production Camera Solutions at IBC 2024 at the Amsterdam RAI Convention Center from 13th to 16th September in the Hitachi Kokusai booth (Hall 11 – Stand No. C10).**

**Neu-Isenburg, Germany,** 20th August 2024 - Hitachi Kokusai Electric Europe GmbH (HKEU) announced today that they will be exhibiting its latest 4K UHD camera systems at IBC 2024 – including ST-2110 MOIP (Media Over IP) functionality. Product debuts include an upgradeable HD camera system for broadcast production and live events with a cost-effective path to 4K-UHD, and a next generation 4K-UHD box camera for use in a wide range of applications.

Products on show include:

### **SK-UHD7000E - UHD & HFR-READY PRODUCTION CAMERA WITH MOIP ST-2110 INTERFACE Upgradable to UHD and HFR with Limited time or Permanent software Licences.**

The SK-UHD7000E incorporates three 2/3-inch Global Shutter CMOS image sensors with native 4K resolution, to enable the pristine capture of 3840x2160 UHD video.

The sensors' global shutter technology minimizes unwanted artifacts such as flickering and banding that could otherwise occur when capturing LED walls and asynchronous lighting in event venues.

We will showcase all the versatility, functionality and options - including UHD and HFR (4x HD Slo-Mo) and ST-2110 25G IP. The HFR (4x HD Slow Motion) camera will be shown with the BLT® RUS POP® slo-mo server - an all-in-one Video Server with Integrated Control Panel and BLT® NUVOLA 4K-UHD acquisition video server.

### **SK-UHD7000E & DOMO QUARTZ TRUE 4K WIRELESS CAMERA SYSTEM (HEVC-COFDM WITH MESH INTERCOM)**

This version of the SK-UHD7000E has an integrated wireless camera system with long range Bi-directional Mesh Intercom system and return video option, creating a compact and ergonomic 4K wireless camera system.

### **Z-HD6500 NEW HDTV-PRODUCTION CAMERA WITH 4K GLOBAL SHUTTER SENSORS & BT.2020 PRISM.**

The Z-HD6500 HD camera with FULL UHD Sensors and BT.2020 Prism for customers seeking exceptional HD visual quality and superior cost/performance value for studio and live production applications.

The Z-HD6500 also delivers exceptional sensitivity for HD production. The F11 sensitivity of 50 frames per second (fps) enables high-quality acquisition in reduced lighting, while a signal-to-noise ratio (SNR) of 62dB delivers super-quiet images. The camera's advanced design enables superior colour reproduction, while its HDTV workflow enables seamless multi-format productions and supports separate controls for High Dynamic Range (HDR) and Standard Dynamic Range (SDR).

### **DK-H700 UHD-POV (Point of View) BOX CAMERA.**

The DK-H700 is a multi-format HD / UHD Box-type camera that uses 2/3-inch, RGB, 8.3 million Effective pixel each CMOS Global Shutter sensors for the delivery of sharp, clear images. At IBC the camera will be displayed with a KXWELL® Robotic System.
